FLEA & TICK TREATMENT – PREP CHECKLIST

Alco Pest Control | 954-427-6008

- Treat all pets with veterinarian-approved flea control
- Bathe pets 24–48 hours before service (do not bathe again for 48 hours after)
- Remove pets from home during treatment
- Pick up pet bedding, toys, food and water bowls
- Vacuum carpets, rugs and furniture (empty bag or clean canister)
- Wash pet bedding and rugs in hot water
- Remove clutter and items from floors
- If yard is treated: mow lawn and remove debris

Do NOT vacuum or mop for 14 days after treatment unless instructed. You may continue to see flea activity for 7–14 days as fleas hatch — this is normal.
